Enhance Your Value with Risk Management Training

This one-day course covering Risk Management is designed to provide participants with an overview of risk management methodologies and best practices.

The workshop covers key concepts, components, and tools required to develop effective measures for monitoring and controlling project risks. Participants will be presented with techniques for identifying, assessing, monitoring, controlling, reporting and analyzing project risks and their impact on project costs and schedules.

Upon completion of this workshop, participants will be able to:

- Implement a Risk Management process
- Analyze risks qualitatively and quantitatively
- Describe risk ownership and reporting approaches
- Document risk plans
- Communicate risks to stakeholders

Attendees will be able to apply these new skills to workplace challenges. The course is highly interactive and includes presentation and interaction methods, in-class group exercises with case studies, group discussions, and experiential learning activities.

Participants will work in small groups with **SimulTrain®**, a computer-based, interactive learning tool that provides real-world issues, challenges, interruptions and pressures of daily work, where they have to manage risk and make decisions. This experiential learning reinforces risk management tools and methods

Earn 7 PDUs or CEUs.
Accountants: Earn 8 CPEs
